SUMMARY

- Full Stack Developer with comprehensive experience in developing and deploying web applications.
- Skilled in MongoDB, Express.js, React.js, Node.js, and additional modern technologies.
- Seeking an internship or co-op position in Full Stack or Front-End Development from Sep 2024 to Dec 2024.
- Adept at creating impactful and scalable solutions.

EDUCATION

Post Graduate in Web Development, Humber College, Canada   Expected Dec 2024
Relevant Coursework: Project Management, Web Development, Database Systems, Product Management.

Post Graduate in Project Management, Canadore College, Canada   2023 - 2023
Relevant Coursework: Project Management, Agile Methodologies, Scrums, Product Management, SDLC.

Bachelor of Information Technology, Charotar University of Science and Technology, India   2018 - 2021
Relevant Coursework: Android Development, Web Development, Object-Oriented Programming Languages

SKILLS

Languages	JavaScript, TypeScript, HTML, CSS, SQL, PHP, C#, Java
Frameworks	React.js, Node.js, Express.js, Next.js, Angular, Spring Boot, Tailwind CSS, PrimeNG, Bootstrap
Databases	MongoDB, MySQL, PostgreSQL, Firebase
Tools	Git, Docker, Jenkins, AWS, Heroku, Stripe API
Testing	Jasmine, Cypress, Jest

PROJECTS

Food Delivery App   MongoDB, Express.js, React.js, Node.js, Stripe

- Developed a full-stack food delivery application using MongoDB, Express.js, React.js, and Node.js (MERN).
- Integrated Stripe API for secure payment processing, enabling seamless transactions for users.
- Implemented user authentication and order tracking features, enhancing user experience and satisfaction.

CaseCobra   Next.js, Node.js, PostgreSQL, Tailwind CSS

- Built a customizable e-commerce platform for designing and ordering mobile cover cases using Next.js and Node.js.
- Utilized PostgreSQL for database management, ensuring efficient data storage and retrieval.
- Styled the application with Tailwind CSS, providing a responsive and visually appealing user interface.
- Implemented user authentication and payment processing to facilitate secure transactions.

Airbnb Clone   Angular, Spring Boot, PrimeNG, PostgreSQL

- Designed a full-stack application to replicate core features of Airbnb, including property listings, booking, and user reviews.
- Utilized Angular for front-end development and Spring Boot for back-end services.
- Implemented PrimeNG for a rich set of UI components and PostgreSQL for robust database management.
- Focused on scalability and performance optimization to handle a large user base efficiently.
